

## RANGE : LUNAR

The LUNAR 3 is a premium manual turntable designed to deliver the unique sound of all types of vinyl records. It is ideal for both seasoned audiophiles and those looking for their first high-quality turntable.

Assembled in Europe by our partner Pro-Ject, the LUNAR 3 features a benchmark cartridge: an Ortofon 2M RED factory fitted to an extremely rigid and lightweight carbon fiber straight tonearm.

The components of its motor and belt drive system ensure superior motion quality. Together with carefully selected materials, they turn the LUNAR 3 into a high-precision piece of engineering.

Designed to be universal, the LUNAR 3 incorporates a phono preamp that can be activated when required, enabling it to be connected to a pair of active speakers as well as a more traditional Hi-Fi system.

To blend in with your interior, the LUNAR 3 is available in 3 elegant lacquered finishes: White, Black, and Blue.
