

RANGE : *BOREA*

MODEL : *BR09*

The flagship of the range, the Borea BR09 is a floorstander designed in the purest hi-fi tradition. In its 1.1 meters height, it comprises of technology and TRIANGLE know-how.

Its three-way design allocates a transducer to each frequency range for a precise vocal reproduction and depth at low frequency, whilst maintaining a wide soundstage.

The BR09 provides a physical make up similar to that of the most high-end systems. Its three 16cm bass drivers operate in a large "bass-reflex" enclosure, thus enabling the speaker to go down to 35Hz.

Thanks to its delivery of lower frequencies and its high-power handling, this speaker is perfectly suited to larger rooms (more than 30m²).
